OPERATION NOTES	DESCRIPTION
Note 1: Note 2: Note 3: Note 4: Note 5:	This unit must be mounted on an electrically grounded metallic surface. The base surface of the unit must be in full area contact on the mounting surface for best heat transfer. The unit must be located with minimum 2" free air space all around. Under maximum heat dissipation conditions, this unit becomes uncomfortable to touch. It should not be accessible to pilot or crew contact. It must be isolated from any material affected by heat. This unit's static current drain from Pot Switch is negligible. Dimensions are reference only. No FAA-PMA
